

Alcatel-Lucent OpenTouch Multimedia Services

Release 2.3.1

The Alcatel-Lucent OpenTouch® Multimedia Services (OTMS) application delivers a range of unified communication services on a scalable platform that enables employees to work together from any place and on any device.

OTMS offers a fast business response by delivering unified messaging, visual automated attendant, fax services, enterprise instant messaging, click-to-call, conferencing and visual collaboration to all employees in a unified user interface.

OpenTouch Multimedia Services complements the Alcatel-Lucent OmniPCX® Enterprise Communication Server for business communications.

It addresses the communication requirements of enterprises up to 20,000 employees by providing a wide range of enterprise-grade unified communication services.

Features	Benefits
Unified messaging integration with leading enterprise email solutions.	Provides an additional way to receive voice messages from important calls by being informed through email.
OpenTouch Conversation: Software clients on PC, Mac, tablet (Microsoft) and smartphones (Android and iOS) with call services, contact management, instant messaging, screen sharing and more.	Multi-platform availability allows users to stay in touch with business from any device. It reduces call expenses by using VoIP and increases interactions between teams and customers.
Software-based conferencing with VoIP, video and document sharing.	Interact with customers and colleagues inside and outside the company firewall.
Deploy as a software-only version running on VMware.	Integrate UC services in your current infrastructure. It's adapted to what you already have.
Can serve up to 5000 users per virtual machine. It's possible to stack additional OpenTouch servers for more capacity of up to 20,000 users.	Adjustable to fit your business needs and adapt to your platform to offer UC to all employees.

Technical specifications

User experience

Office workers at the desk and on the go

Common application services

- Software client with intuitive graphical user interface (GUI)
 - Background mode notifications
- Initiate and answer voice and IM sessions, manage conferences
- Add participants to chat and call
- Business caller ID and picture presentation
- On-call services: deflect, inquiry, hold/retrieve, broker, transfer, conference, record, callback request, dual-tone multifrequency (DTMF) signaling
- Single identity across devices

- Record online
- Shared mailbox

Datasheet

Operations

Serviceability toolkit

- Virtual machine silent installation tool
- Maintenance portal

Infrastructure

Architecture

- Can be deployed either as a software-only version or as a virtual machine:
 - A dedicated Capacity Planning tool is available to design the sizing of the physical appliance server in case of Software-only version.
 - VMware 5.5 and above

- Open SIP communications
- G.711, G722, G.729
- H.264
- Stackable servers of virtual machines
- Recommended Communication server: OmniPCX Enterprise Communication Server R12.1 MD1 and above
- Recommended management application: Alcatel-Lucent OmniVista® 8770 Network Management System 3.2.8
- Off-site and guest access:
 - Web and smartphone apps: Third-party reverse proxy
 - VoIP and video: OpenTouch Session Border Controller

Security and high availability

- Compatible with OmniPCX Enterprise CS:
 - Spatial redundancy
 - Remote site survivability with passive communication server (PCS)
- Compatible with VMware H.A.
- Dual HDD (RAID1)
- Encryption on messaging and conferencing

Complete openness

- Web Services: REST APIs

System limits

Capability	System Limit	OTMS
Telephony, IM, presence and access to conferences	Users (single OpenTouch MS instance)	5000
	Users (OpenTouch MS networking)	20000
	Devices (desk phone, computer, smartphone) per OpenTouch MS instance	10000
	Maximum number of participants in conferences with audio, IM and content sharing	1000
	Maximum number of participants in conferences with audio, video, IM and content sharing	500
Architecture	Maximum number of OmniPCX Enterprise CS per OpenTouch network	20
